

Launch a successful MVNO with our Aggregator program

Plum's Aggregator program is for MVNOs looking to create their own wireless plans on the T-Mobile 5G Network. The program is designed for fully licensed and regulated operators who wish to build their own wireless offering. Partners can leverage Plum's experience, allowing them to get a smooth start while avoiding missteps common to those entering the MVNO space.

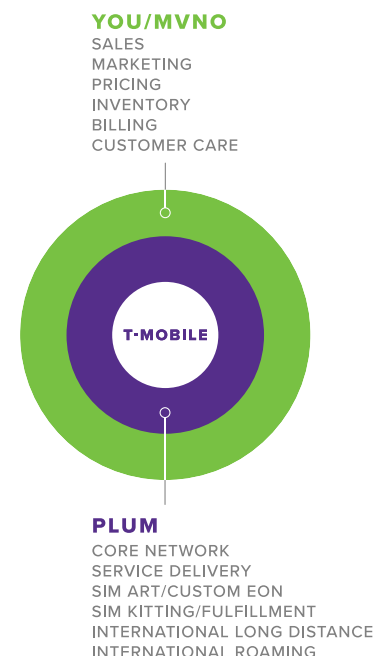

Become an MVNO with Plum™

The Aggregator program offers aspiring or existing MVNOs flexible wholesale pricing options, features, and add-on services. Plum offers a wide range of features including data throttling, network usage alerts, international roaming, caller ID, and visual voicemail. Plans can include pooled, unit-based, or pre-configured wholesale pricing. We support both direct and MVNE integrations based on your needs or current configuration.

Get the best operational experience with end to end support

In addition to experience and partnership, you also have access to our best-in-class operational elements leveraging the experience of our own in-house brands:

- Custom EON options
- Fulfillment via API integration
- Product and feature enhancements including international long distance, tailored to your business needs
- End-user plans have a variety of configuration options and are built at the network level with real-time monitoring and management
- Additional services available: SIM kit printing, SIM kitting and 3PL

The Plum Difference
